Project Description

According to the Bank's website, the project consists of a long term financing to support the construction and operation of EDGE Certified student accommodations totalling approximately 48,000 beds in 38 buildings.

The Project is expected to have a positive impact on Kenya's student housing sector by supporting the construction of new student housing units located near major universities.

DFC will support Acorn Holdings Ltd, to develop affordable, safe and sustainable student housing units offering a total of almost 48,000 beds. In order to finance the building and operation of new housing developments, Acorn Holdings has created two Real Estate Investment Trusts (REITs). As part of the REIT structure, Acorn established the Vuka Investment Portal which will allow Kenyan retail investors to invest directly in the REITs. These REITs will create an innovative financing structure that will allow local Kenyan retail investors to invest in Acorn's purpose-built student housing (PBSA).

Early Warning System Project Analysis

DFC loans to Borrowers to support a real estate investment trust (REIT), for the purpose of constructing student housing in urban/suburban areas of university towns/cities are screened as a Financial Intermediary B (FI-B) for environmental and social assessment. These downstream investments are expected to result in minimal adverse environmental and social impacts. Therefore, all those downstream investments have been pre-screened as low risk and further review and consent is not required for these investments.
