## Project Description

According to the Bank's website, the project consists of a corporate loan of up to \$250 million that is expected to qualify as Tier 2 capital for the purpose of (i) strengthening the Borrower's capital position, (ii) maintaining its prudential ratios, and (iii) supporting the economic recovery across member states in Africa amid high inflation, interest rates, and geopolitical instability.

The Project seeks to provide relatively uncommon patient long-term and less pro-cyclical capital to the Borrower's Tier 2 financing layer to address its liquidity requirements. More specifically, as a Nigerian-based development finance institution operating across the continent, the Project will enable the Borrower to strengthen its balance sheet, increase its asset base, potentially raise and/or otherwise mobilize additional private capital, and effectively achieve and maintain internal regulatory capital adequacy ratios above Basel guidelines in a regional macroeconomic environment characterized by instability, shallow financial markets, high interest rates, and inflation.
