Project Description

According to the Bank's website, the project consists of a working capital loan guarantee to grow its business connecting small farmers and farmer producer organizations to buyers of agricultural produce.

The Project is expected to have positive developmental impact in India by expanding a growing agro-tech platform connecting buyers and sellers of agricultural produce, primarily targeting smallholder farmers and SMEs from underserved regions. This growth is expected to support smallholder farmers selling commodities by providing transparency in pricing and delivery and improving their incomes post-harvest while also providing SME processors with access to higher value markets.
