## Project Description

According to bank provided project information, the proceeds of the Loan will be used for the purposes of;

- (1) improving access to public services and private markets for the poor,
- (2) increasing agency for women and girls, and
- (3) investing in climate adaptation and resilience, in each case by providing finance in the form of Debt Instruments (but not Convertible Instruments) to MSMEs in the Project Countries in accordance with the terms and subject to the conditions set forth in the Transaction Documents (the “Project”).

The Project is expected to have a positive development impact by addressing the global MSME finance gap with an innovative strategy targeting early-stage enterprises which benefit underserved populations primarily in low-income and lower middle-income countries. The Borrower’s investment strategy of deploying fit-for-purpose debt and equity instruments is supported by an in-house impact management, gender-lens investing, and climate-lens investing tools. Women are expected to particularly benefit from the Project, with the Sponsor, having adopted a strong suite of gender-lens investing tools for screening potential investments and ongoing portfolio monitoring. As a result, the Project is expected to qualify for 2X based on the employment, leadership, and investment through financial intermediaries criteria.
