Project Description

According to bank provided information, the project involves the design, construction, and installation of new water treatment plants and related water distribution network in the Cunene province in the Republic of Angola by Cunene II Consortium LLC (the “Project”).

The Project is expected to have a positive development impact in Angola by establishing a source of potable water for approximately 247,200 Angolans. The Project will also increase storage capacity, which will strengthen the region’s resilience to drought.
