## Project Description

According to the Bank's website, the project involves the provision of loan guaranty and financial lease guaranty facility for micro-, small-, and medium-sized enterprises ("MSMEs") operating in and households located in the West Bank.

By partnering with local lenders and lessors to de-risk financing MSMEs, the Project will not only increase access to finance in the short term but will increase local financial institutions' confidence in future lending to this enterprise segment. DFC technical assistance ("TA"), operating in coordinating with MEII's existing TA program, will support both the partner financial institutions ("FIs") and MSMEs. The Project is particularly expected to benefit women-owned enterprises through the adoption of strong gender targets, partnership with new FIs targeting women borrowers, and business development support to women micro entrepreneurs. Additionally, the Project will expand eligibility for coverage to home improvement loans for the first time, expected to represent 15% of the guaranty cover.

## Early Warning System Project Analysis

DFC loan portfolio guarantees for financial intermediaries to expand their MSME portfolio are screened as a Financial Intermediary C (FI-C) for environmental and social assessment. These downstream investments are expected to result in minimal adverse environmental and social impacts. Therefore, all those downstream investments have been pre-screened as low risk and further review and consent is not required for these investments.
