Project Description

According to the Public Information Summary, The Project is expected to have a developmental impact on Colombia's economy through the provision of long-term machinery and vehicle leases to SMEs. In Colombia, SMEs generate about 67% of employment and 28% of GDP, yet they have limited access to financing for vehicles, particularly as prices rise due to inflation. An estimated 45% of Colombian SMEs require vehicles or machinery to operate their businesses, yet only 11% of credit is used for leasing such machinery. Renting rather than purchasing equipment can help SMEs maintain capital levels, preserve credit lines, and access technology at lower costs. DFC financing is expected to support the Project Company in extending operating leases to SMEs in various industries, including agribusiness, port operations, and river transportation, with an emphasis on lending to rural and women-owned or -led SMEs.
