| Project Cost (USD) | \$ 25.00 million |

Project Description

According to bank documents, "This Project is expected to have a highly developmental impact by expanding the availability of credit to SMEs in India. SMEs contribute 45% of GDP and represent the second largest employer in India after the agriculture sector. Despite their significance, SMEs are constrained by accessing finance and face a formal financing gap of approximately \$224 billion....The Project will help to address the financing gap by providing credit to an estimated 4,600 SMEs, while establishing a new program to target lending to women-owned SMEs."
