EBRD/IEA Sustainable Technology Roadmap and Analysis for the Global Nitrogen Fertilizer Industry

Project Description

According to EBRD website, the project aims to identify both the policy and technology development and deployment actions needed to achieve a sustainable low-carbon future of the global fertilizer industry, reducing or mitigating the impacts of the industry’s future development on climate change. Furthermore this project would also be developed in an international climate policy and industrial competitiveness context.

Investment Description

- European Bank for Reconstruction and Development (EBRD)

ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent. You can contact the PCM at pcm@ebrd.com or you can submit a complaint online using an online form, http://www.ebrd.com/eform/pcm/complaint_form?language=en. You can learn more about the PCM and how to file a complaint at http://www.ebrd.com/work-with-us/project-finance/project-complaint-mechanism.html.
