Egypt: Technical and operational management consultancy for the
Investment Plan (IP) under the CIF Industry Decarbonisation
Programme

Quick Facts

Countries	Egypt
Financial Institutions	European Bank for Reconstruction and Development (EBRD)
Status	Approved
Bank Risk Rating	U
Borrower	Government of Egypt
Sectors	Climate and Environment, Energy, Industry and Trade, Law and Government, Technical Cooperation
Investment Type(s)	Advisory Services

Project Description

As stated by the EBRD, industry is a leading, and growing, source of greenhouse gas (GHG) emissions and will be one of the most challenging sectors to decarbonise, requiring a concerted combination of policy, institutional, and market solutions. By 2050, around 60 percent of heavy industry emission reductions will need to come from technologies that are not currently market ready. Early and accelerated investment in low-carbon and climate-resilient technologies in fast-developing economies will be critical.

The Climate Investment Funds (CIF) established the Industry Decarbonisation Programme (IDP) under the Clean Technology Fund (CTF) to support and accelerate the transition of these high-emitting industrial sectors in developing countries to zero-carbon practice, support the development of clean technology supply chains, and unlock investments in low to net zero-carbon and climate-resilient business models and technologies. Egypt was one of seven countries selected to participate in the CIF IDP and develop an Investment Plan (IP). Participation in the programme, and submission of an IP, secures up to USD 250 million in concessional finance for Egypt to support industrial decarbonisation projects, of which a minimum of 50% must be deployed to the private sector.

This funding will be complemented by MDB investment and private sector contributions. The IP is a business plan, to be developed by the Government of the Arab Republic of Egypt (GoE) in cooperation with the CIF's Multilateral Development Bank (MDB) partners, in this case with the European Bank for Reconstruction and Development (EBRD), World Bank (WB), International Finance Corporation (IFC), and African Development Bank (AfDB). The GoE designated the EBRD as the "Coordinating MDB" to provide overall oversight on the IP preparation process on behalf of the joint MDB group. The IP will lay out government priorities and proposals, identify potential areas for MDB investment and technical assistance, as relevant, and will include mobilisation of complementary co-financing, including from bilateral, multilateral, and private sources.

The objective of the Assignment is to support the development of the Egyptian IDP IP and manage associated tasks and coordination, in collaboration with governmental counterparts, MDB partners, the private sector, and other relevant stakeholders. Specifically, the Assignment will contribute to:

- * Coordination of the IP process, including managing inclusive and robust stakeholder engagement processes (e.g., government counterparts, MDBs, CIF Secretariat, private sector, and other relevant organisations).
- * Preparation of key inputs to the IP process, including inter alia ToRs for missions; Aide Memoires etc.
- * Support the preparation and implementation of scoping/joint missions to Egypt on-site.
- * Prepare technical inputs and presentations to inform the scoping/joint missions to Egypt on-site.
- * Lead technical drafting of the IP document in consultation with all relevant stakeholders (i.e., MDBs/Government). Draft the IP, produce updates and final version.
- * Prepare and contribute to necessary technical assessments to feed into and inform the IP development.
- * Develop technical inputs related to IPPG requests.
- * Identify and help the GoE and MDBs establish contact with suitable private sector companies enabling consultations for financing decarbonisation projects in such companies.
- * Lead the process of collecting and addressing the feedback on the IP drafts (from MDBs, CIF Secretariat, public consultations, TFC members, GoE).
- * As needed, lead preparation of the presentation materials required for the TFC meetings Egypt IP session.
- * Facilitate consultation meetings and technical discussions with identified key stakeholders (e.g. private sector, development partners, etc.).
- * Provide any other relevant technical and/or logistical and coordination support to all IP stakeholders as a "collaborative", as relevant.

Investment Description

- European Bank for Reconstruction and Development (EBRD)

Information on the investment amount was not provided at the time of disclosure.

ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent.

You can contact the PCM at: pcm@ebrd.com or you can submit a complaint online using an online form at:

http://www.ebrd.com/eform/pcm/complaint_form?language=en

You can learn more about the PCM and how to file a complaint at: <http://www.ebrd.com/work-with-us/project-finance/project-complaint-mechanism.html>
