EBRD-22696

Support with the establishment of perimeters for concession for  
offshore wind energy

## Quick Facts

<b>Countries</b>	Romania
<b>Financial Institutions</b>	European Bank for Reconstruction and Development (EBRD)
<b>Status</b>	Approved
<b>Bank Risk Rating</b>	U
<b>Borrower</b>	Government of Romania
<b>Sectors</b>	Energy, Law and Government
<b>Investment Type(s)</b>	Advisory Services

## Project Description

As stated by the EBRD, in 2023, Romania adopted the Government Decision "on the approval of the general legal framework for the implementation and functioning of the Contracts for Difference support mechanism for low carbon technologies" with the Bank's assistance under the REMA Programme, paving the way for the development of a support scheme for offshore wind capacities.

In 2023, Romania adopted the Government Decision "on the approval of the general legal framework for the implementation and functioning of the Contracts for Difference support mechanism for low carbon technologies" with the Bank's assistance under the REMA Programme, paving the way for the development of a support scheme for offshore wind capacities.

Under the Offshore Wind Energy Law (2024), the Ministry of Energy now aims to install 3 GW of offshore wind capacity by 2035.

The Ministry has hence requested EBRD's support with identifying suitable concession areas (perimeters) to establish the technical foundation for developing offshore wind in the Romanian Black Sea.

This TC identifies and delimits maritime perimeters for installing offshore wind capacities with a minimum potential capacity of 800 MW.

This study provides potential offshore wind developers the basic elements required for concessionable marine perimeters, such as wind resource, geotechnical and seabed conditions, environmental conditions, interconnection with the national energy system and integration of spatial constraints.

The TC is part of the broader REMA Programme in Romania and focuses on the technical groundwork for offshore wind development in its first phase. A subsequent phase will focus on the development of a support scheme for offshore wind.

## Investment Description

- European Bank for Reconstruction and Development (EBRD)

*Investment information not provided at the time of disclosure.*

### ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent.

You can contact the PCM at: [pcm@ebrd.com](mailto:pcm@ebrd.com) or you can submit a complaint online using an online form at:

[http://www.ebrd.com/eform/pcm/complaint\\_form?language=en](http://www.ebrd.com/eform/pcm/complaint_form?language=en)

You can learn more about the PCM and how to file a complaint at: <http://www.ebrd.com/work-with-us/project-finance/project-complaint-mechanism.html>
