PROJECT DESCRIPTION

Under the Tajikistan Solid Waste Framework the EBRD is considering financing priority capital investments for selected cities in Tajikistan. The framework consists of sub-projects aimed at improving the solid waste management services.

TRANSITION IMPACT

The transition impact potential of each sub-project under the framework is expected to arise from:(i) Consolidation of solid waste activities under one company (where applicable);(ii) Ownership transfer from the national authorities to municipal authorities in line with best practice (where applicable);(iii) The signing of a Public Service Contract between the company and the municipality with performance indicators;(iv) Tariff reform (i.e., adoption of cost recovery principle, tariff increases to operational cost recovery, etc.); and(v) Capacity building for the company (e.g., preparation of a Corporate Development Programme).

THE CLIENT

Solid waste management company in each participating city.

EBRD FINANCE

For each sub-project the EBRD will provide sovereign guaranteed loans to the solid waste companies. Total amount of the loans proposed under the framework: USD26 million

PROJECT COST

Up to USD 64.2 million including investment and technical cooperation grants.

ENVIRONMENTAL IMPACT

The Framework is not categorised under the 2008 E&S Policy; however, each sub-project will be categorised. The sub-projects are expected to bring substantial environmental, health and safety benefits to the subject cities and the surrounding communities through the rehabilitation of waste collection, transportation, and disposal services; increased operational efficiency, and environmental and hygiene standards. The ESDD for each sub-project will include at minimum an assessment of potential E&S impacts and benefits, and an E&S audit of the operations and facilities of each participating Municipality to help structure the PIPs. Corrective ESAPs and SEPs will be prepared for implementation during the projects, where necessary. Derogation from the ESP may need to be sought because the limited financial resources available are unlikely to be adequate for meeting the EU environmental requirements relating to recovery, recycling and re-use of waste and disposing of waste as

Contact Information

ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent. You can contact the PCM at pcm@ebrd.com or you can submit a complaint online using an online form, http://www.ebrd.com/eform/pcm/complaint_form?language=en. You can learn more about the PCM and how to file a complaint at <http://www.ebrd.com/work-with-us/project-finance/project-complaint-mechanism.html>.
