Project Description

According to EBRD website, the project comes under the TurWiB framework, which is an integrated and dedicated programme supporting women entrepreneurship and women-led SMEs. The goal of the facility is to strengthen women's participation in the economy by improving access to finance and advice. The proposed facility to Garanti will be supported by (i) a technical cooperation programme to help the bank develop financial products that meet the specific needs of women-led enterprises, and (ii) a risk sharing mechanism to stimulate lending to this group on a sustainable basis. It will benefit from synergies with the Women in Business Small Business Support component; which constitute the grant component of the TurWiB programme.

In addition, the facility will be supported by a comprehensive technical cooperation programme focusing on institutional capacity building, product development and marketing and outreach activities to build Garanti's capacity to reach out to women-led SMEs. The overall objective of the technical cooperation will be to support Garanti in the process of better understanding the financial needs of the women-led SME segment, and enable it to develop adequate customer information systems, optimise its lending procedures, and develop and market products and services to respond to the segment needs. The technical cooperation for the programme will be jointly funded by the EU's Instrument for Pre-Accession Assistance (IPA) and the Turkish Ministry of Labour and Social Security.
