## Project Description

The EBRD is providing a loan to Isbank under the Turkey Mid-Size Sustainable Energy Financing Facility III. This is the third transaction with Isbank under this financing facility.

The project can be funded through a range of financing instruments, including but not limited to senior notes issued under the company's existing Diversified Payment Rights programme.

This project finances Isbank for on-lending to private sector borrowers for renewable energy (RE) and resource efficiency (ResE) investments.

The project is aimed at: i) increasing private sector involvement for RE and ResE investments; ii) improving these private financial intermediaries skills in technical assessment of a broader set of technologies; and iii) increasing these private financial intermediaries knowledge of relevant EU environmental and social requirements and standards.
