Project Description

The project consists of energy efficiency investments along the gas pipeline and transmission network system of the Arab Republic of Egypt. The energy efficiency investments will aim to deploy technical and feasible projects in the following areas a) waste heat recovery technologies at the sites of Amerya, Dahshour and the Western Desert Gas Complex; b) turbo-expanders technologies at natural gas pressure reduction stations; c) other resource efficiency and environmental investments including an LPG separation plant and CO2-equivalent/mercury removal from wet gas systems and d) gas metering data systems infrastructure. Through the energy efficiency investments, the project will help conserve considerable amounts of currently used energy, and as such yield significant greenhouse gas emission savings in excess of 251,000 tonnes of CO2 a year.

ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent. You can contact the PCM at pcm@ebrd.com or you can submit a complaint online using an online form, http://www.ebrd.com/eform/pcm/complaint_form?language=en. You can learn more about the PCM and how to file a complaint at http://www.ebrd.com/work-with-us/project-finance/project-complaint-mechanism.html.
