BRUA Pipeline

Quick Facts

Countries	Romania
Financial Institutions	European Bank for Reconstruction and Development (EBRD)
Status	Approved
Bank Risk Rating	A
Voting Date	2017-12-13
Borrower	SNTGN TRANSGAZ SA
Sectors	Climate and Environment, Energy
Investment Type(s)	Loan
Investment Amount (USD)	\$ 71.02 million
Loan Amount (USD)	\$ 71.02 million
Project Cost (USD)	\$ 566.99 million

Project Description

According to EIB website, the project consists of the construction of a new 478 km natural gas trunk pipeline on the Romanian territory, part of Bulgaria-Romania-Hungary-Austria gas pipeline and three compressor stations. Initial capacity of the pipeline is set at 1.75 bcm per annum, which will be further increased in the future to 4.4 bcm per annum.

It aims to enhance regions energy security by diversifying gas supply routes. Further, it would allow access to the future major gas infrastructure projects such as TAP, gas sources from Central European gas hubs and potential gas transportation from Black Sea deposits. The project is also in line with the Green Economy Transition (GET) initiative of the Bank as it will result in direct and indirect energy efficiency and carbon emissions reductions by modernising the Romanian gas infrastructure and contributing to the switch to gas from more polluting energy sources.

This project

will help to diversify the regional gas supply from its current limited number of major pipelines by connecting the area with future major gas infrastructure projects such as TAP, gas sources from Central European gas hubs and potential gas transportation from Black Sea deposits. Greater integration of European gas markets will allow competition to develop across borders, producing important economic benefits for consumers and increased security of supply. The project has been designated as European Commission's Project of Common Interest and forms part of the North-South Gas Interconnections in Central Eastern and South Eastern Europe (NSI East Gas) priority gas corridor which includes gas infrastructure for regional connections between and within the Baltic Sea region, Adriatic and Aegean Seas, eastern Mediterranean Sea and Black Sea.

ACCOUNTABILITY MECHANISM OF EBRD

The Project Complaint Mechanism (PCM) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an European Bank for Reconstruction and Development (EBRD)-financed project. If you submit a complaint to the PCM, it may assess compliance with EBRD's own policies and procedures to prevent harm to the environment or communities or it may assist you in resolving the problem that led to the complaint through a dialogue with those implementing the project. Additionally, the PCM has the authority to recommend a project be suspended in the event that harm is imminent. You can contact the PCM at pcm@ebrd.com or you can submit a complaint online using an online form, http://www.ebrd.com/eform/pcm/complaint_form?language=en. You can learn more about the PCM and how to file a complaint at <http://www.ebrd.com/work-with-us/project-finance/project-complaint-mechanism.html>.
