According to the bank website, the transaction consisted of an investment in senior notes under a true sale revolving securitisation structure in Greece issued by a special purpose vehicle. The asset pool consisted of auto leases originated and sold by Autohellas S.A. (AH) to the Issuer. Currently, the project has completed its life cycle and the senior notes have been repaid. The investment represented an accessible alternative funding channel for AH, in order to diversify its funding base and attract international investors. The project also supported AH on extending new leases to Greek SMEs.
