Project Description

According to the bank website, the project consists in an investment of EUR 10 million in credit linked notes, issued by Aurora SME I Designated Activity Company, covering the credit risk of the mezzanine tranche in a synthetic balance sheet securitisation of a performing SME and corporate loans portfolio, originated by Alpha Bank S.A., a commercial bank incorporated in Greece. The project boosts the resilience of a systemic bank in Greece, by allowing Alpha Bank to achieve a risk-weighted assets' relief and optimise its regulatory capital requirements. Furthermore, the EBRD promotes resource efficiency in the country by requiring Alpha Bank to allocate funds in the amount of 1.5 times of EBRD's subscription to finance green investments in renewable energy and energy efficiency.
