### Project Description

According to the bank website, the project consists in an equity investment in Public Power Corporation S.A., the Greek state-owned energy utility. This is envisaged to reduce the state's shareholding from 51% to a minority position of around 34%. The operation will enable the Company to i) accelerate its expansion into renewable energy, digitalisation and e-mobility and ii) support the privatisation of PPC. Both elements further support one of the most ambitious green energy transition and corporate transformations in Europe, that includes an ambitious decarbonisation pathway aiming to transform PPC from a heavily coal dependent to a modern green, digitalised utility.
