Project Description

The project involves the provision of EUR 50 million investment in a EUR 350 million Senior Preferred bond issued by Piraeus Bank S.A. ("Piraeus"), a commercial bank incorporated in Greece, in November 2022. The SP bonds have a maturity of 4 years, with an embedded issuer call option after 3 years, and are listed on the Luxembourg Stock Exchange's Euro MTF market. This is EBRD's first investment in an SP instrument issued by Piraeus Bank, and the second SP bond by the bank, after its debut issuance in October 2021.

The project supports the resilience and regulatory compliance of the largest bank in Greece in terms of assets, a systemically important institution in the country, and contributes to the capital market development in Greece. Furthermore, the EBRD promotes resource efficiency in the country by requiring Piraeus Bank to allocate funds in the amount of 1.7 times of the EBRD's subscription to finance green investments in renewable energy and energy efficiency.
