## Project Description

According to the bank website, the project consists of a loan in favor of JSC Elektrani na Severna Makedonija to support the Company's liquidity needs in the midst of the energy crises affecting North Macedonia.

The proposed loan addresses an emergency liquidity gap, by providing financial support to ESM and policy dialogue to the Energy Sector to address structural issues in the local energy market. It provides vital liquidity support to continue to endorse ESM's decarbonisation strategy following the successful commissioning of its first solar plant Oslomej ("Oslomej", DTM 50415) with a capacity of 10MW and the upcoming signing of an additional 30MW solar PV plant in Oslomej (10MW extension) and Bitola (20MW) (DTM 52320).
