Project Description

According to the bank-provided information, the project involves the provision of an equity investment for the full acquisition of Tamweely for Microfinance (TW) alongside a consortium of investors made up of EBRD, SPE Capital, Tanmiya Capital Ventures (TCV), and British International Investment (BII).

The project entails a full divestment by Egyptian State affiliates of one of the fastest growing microfinance institutions (MFIs) in Egypt. The company will benefit from strengthened governance, in full alignment with regional standards and international best practice. The EBRD will also, alongside its co-investors, support TW's plans to grow its existing microfinance portfolio and expand into new products such as SME finance. The project will facilitate access to finance for private sector businesses, including MSMEs, which remain underserved in the Egyptian market, and generally increase the reach of TW for underserved segments by incorporating a significant gender angle.
