The proposed facility will be the first transaction with the Company under GEFF Türkiye and builds on the Company's experience and successful utilisation of the two TurSEFF lines signed in 2018 and 2021. The proposed facility will help GarantiBBVA Leasing to continue to expand its on-lending to private sector SMEs, both women and men-led, for energy efficiency and small-scale renewable energy investments, promoting female entrepreneurs' access to green technologies. The facility will also aim to help set higher standards and build capacity in the market by better instilling climate risk factors into the Company's leasing practices as the 4th largest player in the market.
