### Project Description

As stated on the project disclosure page, the EBRD is considering for approval in December 2023 an increase in the framework of uncapped unfunded portfolio guarantees to up to EUR 805 million, from EUR 470 million already approved in December 2022, to be provided by the EBRD, as an implementing partner under the European Union's InvestEU programme, to eligible partner financial intermediaries (PFIs) in the 12 EU countries of operations (EU12 CoOs). The portfolio guarantees will cover newly-generated portfolios of loans financing eligible green projects related to buildings or sustainable transport. The Bank's guarantees will be partially covered by first loss risk cover provided by the European Commission (EC) under InvestEU.

The overall objective of the Framework is to contribute towards improved sustainability and minimised climate and environmental footprint of the EU economies where EBRD operates, address the vital issue of carbon intensity of the economies of the EU12 CoOs and the energy crisis triggered by the Russian war on Ukraine. This will be done through enhanced availability of dedicated finance and tailored technical assistance to facilitate and upscale investments in (i) energy efficiency and renewable energy in buildings across sectors and (ii) sustainable mobility.
