## Project Description

According to the Bank's website, the project consists of a senior unsecured loan up to EUR 25m with up to 2 years final maturity and bullet principal repayment, to finance digital transformation investments of the Turkish manufacturing SMEs under the Digital Transformation Financing Facility ("DTFF" or "Programme"), a blended programme established under the Financial Intermediaries Framework ("FIF").

Turkish SMEs are lagging behind their EU and OECD peers in terms of digitalisation, therefore their production and operational processes are often struggling to compete with global peers. DTFF aims to spread the use of digital technologies among Turkish SMEs through promoting and financing digital transformation to significantly boost their competitiveness.

The proposed facility will be the first transaction under the recently approved DTFF programme and builds on TEB's ambition to pioneer digitalisation transformation of their SME clients.
