Early Warning System Project Analysis

Categorised B (ESP 2019). Environmental and social risks associated with a Sustainability-Linked Loan targeting decarbonisation and improving the circularity of resources throughout the company's supply chain are site-specific and can be readily mitigated through good industry practice.

The ESDD suggests potential supply chain risks including labour and deforestation, which are typically associated with the garment and footwear manufacturing sector.

No land acquisition, or specific cultural heritage or biodiversity impacts are expected for the project however the company has the capacity to mitigate for such risks.
