## Project Description

According to the EBRD, the project consists of up to EUR300 million non-recourse long-term senior loan in favour of PGE Baltica 6 Sp. z o.o., to finance the construction and operation of the 1.5GW offshore wind farm located in the Baltic Sea in Poland. The Bank's financing will be provided alongside multiple commercial banks, export agencies and development banks.

The Project represents the largest offshore wind farm envisaged in the first phase of the offshore rollout in Poland (which covers 5.9 GW across 8 projects). Once constructed, the Project is expected to generate 5 TWh of electricity annually, contributing approx. 3.6 million tonnes of CO2 in annual savings. The Bank proceeds will be used to finance the Project's capital expenditure.

This is the second and the largest offshore project in the Bank's countries of operation (CoOs). Through this Project, EBRD will send a positive signal to the market and will have the opportunity to continue to extend its support to Poland's ambitious plans to meet the target of at least 42.5 per cent of final energy consumption from renewable sources by 2030. In this context, the proposed offshore rollout is key to achieving this goal.
