## Early Warning System Project Analysis

Categorised B (ESP 2019). The environmental and social (E&S) impacts associated with the Project are readily identified, mostly site specific and can be addressed through adequate mitigation measures.

ESDD confirmed the company does not have any formal certified environmental and social management systems to manage E&S, although they have various arrangements in place to manage the risks and impacts associated with their operations.

Occupational health and safety (OHS) risks are low, with much of the warehousing arrangements being automated resulting in minimal manual handling operations.

The company sells its products to B2C (football players and enthusiasts) and B2B (football clubs) customers following an omnichannel model, that integrates e-commerce with physical retail and direct sales to football clubs.
