Project Description

As stated in the project disclosure page, the European Bank for Reconstruction and Development loan will finance the acquisition of modern customs equipment and devices for Armenia's Border Crossing Points, essential to enhance customs operations.

The Project aims to improve the efficiency of customs operations at Armenia's borders, including facilitating more effective and streamlined customs clearance processes. These improvements contribute to addressing circumvention risks and illicit trade, and have received strong support from the Government of the Republic of Armenia.

The Project will also provide support to the State Revenue Committee of the Republic of Armenia in assessing the digital maturity of customs operations and identifying transformation opportunities through the EBRD Digital Transformation Support Programme. Additionally, it will facilitate the development of a digital roadmap aligned with international best practices and Armenia's trade facilitation goals.

The Borrower is the Republic of Armenia represented by the Ministry of Finance. The Project Implementing Agency is the SRC, tax and customs authority of the Republic of Armenia.
