Project Description

The proposed line will be important in helping Universal Bank to develop trade finance and factoring business areas and expand its correspondent banking network.

The proposed TFP line for Universal Bank aims to contribute to the project's transition qualities under the TFP (Integrated and Resilient), by facilitating access of products and services to international markets and improving the capacity of PFIs to conduct trade finance operations. The latest extension of the programme continues to support issuance of guarantees in favour of confirming banks to support trade finance instruments and provision of cash advances for potential trade and factoring/reverse factoring transactions of Universal Bank.
