AQABA-AMMAN WATER DESALINATION & CONVEYANCE

Quick Facts

Countries	Jordan
Financial Institutions	European Investment Bank (EIB)
Status	Approved
Bank Risk Rating	U
Voting Date	2022-07-13
Borrower	MINISTRY OF WATER AND IRRIGATION - HASHEMITE KINGDOM OF JORDAN,SPECIAL PURPOSE ENTITY(IES)/FUND
Sectors	Water and Sanitation

Project Description

According to bank provided information, the primary objective of the project is to provide 300 million cubic metres (MCM) of potable water to Amman and other governorates in Jordan and, possibly, to areas along the project pipelines route. The water will come from a seawater reverse osmosis plant south of Aqaba and will be conveyed to Amman via a new, approximately 420 km long water conveyor that would run for most of its part parallel to the existing Disi Conveyor.

Jordan has one of the lowest levels of water availability per capita in the world, which is anticipated to decline even more over the next years. This is due to an increase in population (expected to increase by 2047 from the current estimated 10 million to 18 million inhabitants) and the consequences of climate change in the country. In that context, the AAWDCP is expected to contribute to the following objectives: (i) increase the resilience of the water supply by substantially increasing water production by providing up to additional 300 million cubic metres of water per year to Amman; (ii) adapt to and potentially mitigate the impacts of climate change; and (iii) create jobs both during construction and operation.

The project is a high priority for the Government of Jordan and supports the EU and EIB objectives in the country. Specifically it is in line with:

- National priorities, in particular the National Water Strategy 2016-2025, which identifies projects that contribute to a resilient water sector as a key priority for concessional financing.
- EU policy objectives, as the project is included among the flagship initiatives identified in the EU Joint Communication on Renewed Partnership with the Southern Neighbourhood, published in February 2021.
- The EIB's objectives under the Neighbourhood, Development and International Cooperation Instrument (NDICI), specifically the development of social and economic infrastructure, as well as the Bank's Water Sector Lending Orientation, Adaptation Plan and Climate Bank Roadmap.
- Sustainable Development Goal #6, which calls for ensuring availability and sustainable management of water and sanitation for all, and #11 (make cities and human settlements inclusive, safe, resilient and sustainable).

ACCOUNTABILITY MECHANISM OF EIB

The EIB Complaints Mechanism is designed to facilitate and handle complaints against the EIB by individuals, organizations or corporations affected by EIB activities. When exercising the right to lodge a complaint against the EIB, any member of the public has access to a two-tier procedure, one internal - the Complaints Mechanism Office - and one external - the European Ombudsman. A complaint can be lodged via a written communication addressed to the Secretary General of the EIB, via email to the dedicated email address: complaints@eib.org, by completing the online complaint form available at the following address: <http://www.eib.org/complaints/form> via fax or delivered directly to the EIB Complaints Mechanism Division, any EIB local representation office or any EIB staff. For further details, check:

http://www.eib.org/attachments/strategies/complaints_mechanism_policy_en.pdf

When dissatisfied with a complaint to the EIB Complaints Mechanism, citizens can then turn towards the European Ombudsman. A memorandum of Understanding has been signed between the EIB and the European Ombudsman establishes that citizens (even outside of the EU if the Ombudsman finds their complaint justified) can turn towards the Ombudsman on issues related to 'maladministration' by the EIB. Note that before going to the Ombudsman, an attempt must be made to resolve the case by contacting the EIB. In addition, the complaint must be made within two years of the date when the facts on which your complaint is based became known to you. You can write to the Ombudsman in any of the languages of the European Union. Additional details, including filing requirements and complaint forms, are available at:

<http://www.ombudsman.europa.eu/atyourservice/interactiveguide.faces>
