

EIB-20230222

GUYANA WATER

## Quick Facts

<b>Countries</b>	Guyana
<b>Specific Location</b>	Coastal communities: Walton Hall to Charity, Wakeman, Leguan Island, Bush Lot and Tain to N50 Villag
<b>Financial Institutions</b>	European Investment Bank (EIB)
<b>Status</b>	Approved
<b>Bank Risk Rating</b>	U
<b>Borrower</b>	GUYANA WATER INC
<b>Sectors</b>	Water and Sanitation
<b>Investment Type(s)</b>	Loan
<b>Investment Amount (USD)</b>	\$ 27.00 million
<b>Project Cost (USD)</b>	\$ 89.00 million

## Project Description

### DESCRIPTION

The project will finance the improvement of the water supply services in four regions of Guyana, such as the construction of new wells, five new water treatment plants, new transmission lines, service connections and metering systems in the regions.

The Caribbean Development Bank (CDB) will be EIB borrower/financial intermediary for this operation. CDB will on-lend EIB resources to the Government of Guyana for the purpose of financing the project. The execution agency and promoter, as mentioned above, will be Guyana Water Incorporated (GWI), a public limited company created under the 2002 Water and Sewerage Act of Guyana and the main drinking water supplier of the country.

This is an allocation under EIB project 2016-0150 CDB Climate Action Framework Loan II.

### ENVIRONMENT

Due to the nature of the works to be implemented, the negative environmental impacts are expected to only occur in the construction period and mainly locally based, temporary and reversible (e.g. minor disturbance due to pipe replacement techniques). Such temporary negative effects are assessed as not having any measurable and residual environmental effects and they will be mitigated with appropriate measures, in line with the promoter's Environmental and Social Management and Monitoring Plans.

The project investments are overall expected to have positive long-term effects on the environment as they ensure a more efficient and sustainable use of groundwater resources.

### OBJECTIVE

The project has two main goals:

- (i) to increase the availability and accessibility (water security) to treated water for the population within 5 coastal communities (Walton Hall to Charity, Wakeman, Leguan Island, Bush Lot and Tain to N50 Village), through new and upgraded water supply infrastructure;
- (ii) to improve the water quality by reducing contaminants such as iron.

The project aims at complying with World Health Organization's (WHO) water quality guidelines in the water supply systems. It also complies with the studies carried out in relation to the Guyana's Coastal Aquifer Management System (Groundwater Management 2020 - 2030; Coastal Aquifers Guyana / GWI 2020).

The project is in line with the Integrated Water Supply and Sanitation sector policy (IWSS), prepared by the Government of Guyana and the project promoter.

### PROCUREMENT

The promoter will be responsible to carry out all procurement related to the project. The promoter is a public authority as defined in the EIB's Guide to Procurement (GtP) and the public procurement regime will be applicable to the project components.

The EIB-CDB Procedural Framework (PF) in respect of mutual reliance for jointly co-financed public sector projects in common countries of operation was signed in October 2019. The PF concludes that EIB and CDB share the same public procurement principles of economy, efficiency, transparency, non-discrimination and accountability and that, in practice, the general principles and key features of a sound procurement process supported by the two parties can be considered broadly equivalent for all aspects of procurement.

## ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.eib.org/en/infocentre/registers/request-form/request-form-default.htm>.

According to the EIB website, you can also request general information through this form: <https://www.eib.org/en/infocentre/contact-form.htm>.

## ACCOUNTABILITY MECHANISM OF EIB

The EIB Complaints Mechanism is designed to facilitate and handle complaints against the EIB by individuals, organizations or corporations affected by EIB activities. When exercising the right to lodge a complaint against the EIB, any member of the public has access to a two-tier procedure, one internal - the Complaints Mechanism Office - and one external - the European Ombudsman. A complaint can be lodged via a written communication addressed to the Secretary General of the EIB, via email to the dedicated email address: [complaints@eib.org](mailto:complaints@eib.org), by completing the online complaint form available at the following address: <http://www.eib.org/complaints/form>, via fax or delivered directly to the EIB Complaints Mechanism Division, any EIB local representation office or any EIB staff. For further details, check: [http://www.eib.org/attachments/strategies/complaints\\_mechanism\\_policy\\_en.pdf](http://www.eib.org/attachments/strategies/complaints_mechanism_policy_en.pdf).

When dissatisfied with a complaint to the EIB Complaints Mechanism, citizens can then turn towards the European Ombudsman. A memorandum of Understanding has been signed between the EIB and the European Ombudsman establishes that citizens (even outside of the EU if the Ombudsman finds their complaint justified) can turn towards the Ombudsman on issues related to 'maladministration' by the EIB. Note that before going to the Ombudsman, an attempt must be made to resolve the case by contacting the EIB. In addition, the complaint must be made within two years of the date when the facts on which your complaint is based became known to you. You can write to the Ombudsman in any of the languages of the European Union. Additional details, including filing requirements and complaint forms, are available at: <http://www.ombudsman.europa.eu/atyourservice/interactiveguide.faces>.
