TELE2 5G ROLLOUT IN SWEDEN

Quick Facts

Countries	Sweden
Financial Institutions	European Investment Bank (EIB)
Status	Approved
Bank Risk Rating	U
Voting Date	2024-06-26
Borrower	TELE2 AB
Sectors	Communications
Investment Type(s)	Loan
Investment Amount (USD)	\$ 149.52 million
Project Cost (USD)	\$ 332.16 million

Project Description

According to the Bank's website, the project will finance the design, roll-out and operation of 5G mobile telecommunications to increase coverage from 20% to over 99% across the whole country. Investments also include the replacement of the current 4G equipment to upgrade the 4G network.

The aim is to accelerate the deployment of innovative telecommunication technologies and thus generate a positive impact on users, in terms of improved and faster access to information and innovative digital services.

The 5G infrastructure to be rolled-out will be crucial to expand coverage and capacity of advanced mobile broadband services. Hence, the project is fully in line with the "EU Digital Compass 2030", stating that by 2030 all EU households should have Gigabit connectivity.

Early Warning System Project Analysis

The project involves the installation of equipment in existing infrastructures (towers, rooftop sites and other radio access and core network buildings). The project is limited to the deployment of the telecommunications and facilities equipment (Radio Access equipment, Backhauling infrastructure, Power and Cooling devices, etc...) and the reinforcement and adaptation of the infrastructure (rooftop or towers).. The deployment of a large number of new towers is not part of the project scope. Providing basically equipment within existing infrastructure, it is not expected that the project has a significant negative environmental impact.

During the operations phase, the main potential impact would be related to exposure to EMF (Electro Magnetic Field) emissions by RAN equipment.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.eib.org/en/infocentre/registers/request-form/request-form-default.htm>

ACCOUNTABILITY MECHANISM OF EIB

The EIB Complaints Mechanism is designed to facilitate and handle complaints against the EIB by individuals, organizations or corporations affected by EIB activities. When exercising the right to lodge a complaint against the EIB, any member of the public has access to a two-tier procedure, one internal - the Complaints Mechanism Office - and one external - the European Ombudsman. A complaint can be lodged via a written communication addressed to the Secretary General of the EIB, via email to the dedicated email address: complaints@eib.org, by completing the online complaint form available at the following address: <http://www.eib.org/complaints/form> via fax or delivered directly to the EIB Complaints Mechanism Division, any EIB local representation office or any EIB staff. For further details, check: http://www.eib.org/attachments/strategies/complaints_mechanism_policy_en.pdf

When dissatisfied with a complaint to the EIB Complaints Mechanism, citizens can then turn towards the European Ombudsman. A memorandum of Understanding has been signed between the EIB and the European Ombudsman establishes that citizens (even outside of the EU if the Ombudsman finds their complaint justified) can turn towards the Ombudsman on issues related to 'maladministration' by the EIB. Note that before going to the Ombudsman, an attempt must be made to resolve the case by contacting the EIB. In addition, the complaint must be made within two years of the date when the facts on which your complaint is based became known to you. You can write to the Ombudsman in any of the languages of the European Union. Additional details, including filing requirements and complaint forms, are available at: <http://www.ombudsman.europa.eu/atyourservice/interactiveguide.faces>
