|-------------------------|--------------------------------|
| Countries | Belgium |
| Specific Location | Flanders region |
| Financial Institutions | European Investment Bank (EIB) |
| Status | Approved |
| Bank Risk Rating | U |
| Voting Date | 2025-07-31 |
| Borrower | AQUAFIN NV |
| Sectors | Water and Sanitation |
| Investment Type(s) | Loan |
| Investment Amount (USD) | \$ 302.68 million |
| Project Cost (USD) | \$ 606.50 million |

Project Description

According to the Bank's website, the project will co-finance the 2025-2028 Aquafin's investment programme comprising the construction, extension, rehabilitation and upgrade of sewage collectors, stormwater drainage systems, pumping stations and wastewater treatment plants in Flanders. In addition, it will support the construction of two sludge dryers working on residual heat.

The objective is to extend and improve the supra-municipal wastewater infrastructure in Flanders, the service area of Aquafin. Improvements are reached through the separation of stormwater flows from the wastewater collection network, the rehabilitation of the wastewater collection and treatment system as well as the sludge treatment system.

Investing in wastewater collection and treatment will reduce groundwater and surface water pollution, while investing in stormwater facilities will reduce the risk of sewers flooding and overflowing to surface water by increased precipitation as a consequence of climate change. In addition, the construction of two sludge dryers will substantially reduce the promoter's use of fossil energies and dependencies on third parties.

Early Warning System Project Analysis

The project will ensure continued compliance with the Urban Waste Water Treatment Directive through the construction, extension, rehabilitation and upgrading of the sewers, pumping stations and wastewater treatment plants across Flanders. Full compliance with the Directive 91/271/EC was achieved in 2012, and Aquafin's investment plans are now aimed at connecting agglomerations with fewer than 2,000 population equivalents in line with the new Urban Waste Water Treatment Directive (2024/3019).

Investment Description

- European Investment Bank (EIB)

Private Actors Description

Aquafin NV provides water-treatment services. The Company offers advice on sewage and treatment method, and the operation of the sewage treatment infrastructure in Flanders. Aquafin offers its advice and services in Belgium.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.eib.org/en/infocentre/registers/request-form/request-form-default.htm>

ACCOUNTABILITY MECHANISM OF EIB

The EIB Complaints Mechanism is designed to facilitate and handle complaints against the EIB by individuals, organizations or corporations affected by EIB activities. When exercising the right to lodge a complaint against the EIB, any member of the public has access to a two-tier procedure, one internal - the Complaints Mechanism Office - and one external - the European Ombudsman. A complaint can be lodged via a written communication addressed to the Secretary General of the EIB, via email to the dedicated email address: complaints@eib.org, by completing the online complaint form available at the following address: <http://www.eib.org/complaints/form> via fax or delivered directly to the EIB Complaints Mechanism Division, any EIB local representation office or any EIB staff. For further details, check: http://www.eib.org/attachments/strategies/complaints_mechanism_policy_en.pdf

When dissatisfied with a complaint to the EIB Complaints Mechanism, citizens can then turn towards the European Ombudsman. A memorandum of Understanding has been signed between the EIB and the European Ombudsman establishes that citizens (even outside of the EU if the Ombudsman finds their complaint justified) can turn towards the Ombudsman on issues related to 'maladministration' by the EIB. Note that before going to the Ombudsman, an attempt must be made to resolve the case by contacting the EIB. In addition, the complaint must be made within two years of the date when the facts on which your complaint is based became known to you. You can write to the Ombudsman in any of the languages of the European Union. Additional details, including filing requirements and complaint forms, are available at: <http://www.ombudsman.europa.eu/atyourservice/interactiveguide.faces>
