Project Description

According to the Bank's website, the project concerns the extension of the campus of the University of Silesia in the city centre of Katowice. The project comprises the construction of academic and research buildings, as well as the greening of the campus located along the adjacent river.

The project concerns the extension of SU's campus in the city centre of Katowice. The operations cover the construction of academic and research buildings and the optimisation of use as well as development of the University's plot.

Early Warning System Project Analysis

According to the Environmental and Social Data Sheet, overall, the project is expected to have significant positive social and environmental outcomes (improved educational facilities, urban green space and accessibility) with limited adverse impacts, provided that standard mitigation measures are implemented.

The SPIN-ART component of the Project is located within 4km of a NATURA2000 site (Cieszynskie Zródla Tufowe PLH240001). Local competent authority ascertained that the investment in question will not pose any identified threats to the conservation objectives, will not directly or indirectly affect the achievement of conservation goals, nor will it impact the implementation of planned conservation measures within the Natura 2000 area, therefore an appropriate assessment is not considered necessary.

Based on the environmental, climate and social information provided by the Promoter and based on the review of the likely significant environmental, climate and social risks and impacts and the mitigation measures and management systems in place, the project is deemed to have low residual environmental, climate and social risks and impacts.

Investment Description

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.eib.org/en/infocentre/registers/request-form/request-form-default.htm>

ACCOUNTABILITY MECHANISM OF EIB

The EIB Complaints Mechanism is designed to facilitate and handle complaints against the EIB by individuals, organizations or corporations affected by EIB activities. When exercising the right to lodge a complaint against the EIB, any member of the public has access to a two-tier procedure, one internal - the Complaints Mechanism Office - and one external - the European Ombudsman. A complaint can be lodged via a written communication addressed to the Secretary General of the EIB, via email to the dedicated email address: complaints@eib.org, by completing the online complaint form available at the following address: <http://www.eib.org/complaints/form> via fax or delivered directly to the EIB Complaints Mechanism Division, any EIB local representation office or any EIB staff. For further details, check: http://www.eib.org/attachments/strategies/complaints_mechanism_policy_en.pdf

When dissatisfied with a complaint to the EIB Complaints Mechanism, citizens can then turn towards the European Ombudsman. A memorandum of Understanding has been signed between the EIB and the European Ombudsman establishes that citizens (even outside of the EU if the Ombudsman finds their complaint justified) can turn towards the Ombudsman on issues related to 'maladministration' by the EIB. Note that before going to the Ombudsman, an attempt must be made to resolve the case by contacting the EIB. In addition, the complaint must be made within two years of the date when the facts on which your complaint is based became known to you. You can write to the Ombudsman in any of the languages of the European Union. Additional details, including filing requirements and complaint forms, are available at: <http://www.ombudsman.europa.eu/atyourservice/interactiveguide.faces>
