<b>Investment Type(s)</b>	Loan
<b>Investment Amount (USD)</b>	\$ 152.00 million
<b>Project Cost (USD)</b>	\$ 572.00 million

## Project Description

According to bank provided information, the project concerns the design, construction and operation of the 250MW Niat and 250MW Rasgha onshore wind farms along the west bank of the Gulf of Suez near Ras Ghareb, Red Sea Governorate, Egypt.

The project aims to increase the production of electricity from low carbon sources (onshore wind) and addresses negative climate and environmental externalities, a market failure, through the reduction of carbon and air pollution. The project contributes to Egypt's Vision 2030 and Integrated Sustainable Energy Strategy (ISES) 2035, supporting the country's commitment to reach 42% of electricity generation from renewable sources by 2030. The financing of this project is in line with the Bank's lending priority objectives on Energy (Renewable Energy) as well as the transversal objectives on Climate Action (mitigation), Environmental Sustainability (Pollution Prevention Control).

The national environmental protection framework in Egypt is established by Environmental Law 4/1994 (as subsequently amended), alongside its Executive Regulations.

According to this framework, the Project was categorized by the competent authority as being 'Category Scoped C', with potentially highly adverse and long-term environmental impacts. Such projects are mandated to undergo a full, comprehensive Environmental and Social Impact Assessment (ESIA) in accordance with the Egyptian Environmental Affairs Agency (EEAA) guidelines, and therefore an ESIA is required under EIB E&S Standards.

The Bank will require the promoter to ensure that implementation of the project will be done in accordance with the Bank's Guide to Procurement. The project seems to be operating without exclusive or special rights within the meaning of the EU Utilities Directive 2004/17/EC and 2014/25/EU, hence private sector procurement procedures will apply. This will be further assessed during the appraisal.

## ACCOUNTABILITY MECHANISM OF EIB

The EIB Complaints Mechanism is designed to facilitate and handle complaints against the EIB by individuals, organizations or corporations affected by EIB activities. When exercising the right to lodge a complaint against the EIB, any member of the public has access to a two-tier procedure, one internal - the Complaints Mechanism Office - and one external - the European Ombudsman. A complaint can be lodged via a written communication addressed to the Secretary General of the EIB, via email to the dedicated email address: [complaints@eib.org](mailto:complaints@eib.org), by completing the online complaint form available at the following address: <http://www.eib.org/complaints/form> via fax or delivered directly to the EIB Complaints Mechanism Division, any EIB local representation office or any EIB staff. For further details, check:

[http://www.eib.org/attachments/strategies/complaints\\_mechanism\\_policy\\_en.pdf](http://www.eib.org/attachments/strategies/complaints_mechanism_policy_en.pdf)

When dissatisfied with a complaint to the EIB Complaints Mechanism, citizens can then turn towards the European Ombudsman. A memorandum of Understanding has been signed between the EIB and the European Ombudsman establishes that citizens (even outside of the EU if the Ombudsman finds their complaint justified) can turn towards the Ombudsman on issues related to 'maladministration' by the EIB. Note that before going to the Ombudsman, an attempt must be made to resolve the case by contacting the EIB. In addition, the complaint must be made within two years of the date when the facts on which your complaint is based became known to you. You can write to the Ombudsman in any of the languages of the European Union. Additional details, including filing requirements and complaint forms, are available at:

<http://www.ombudsman.europa.eu/atyourservice/interactiveguide.faces>
