FMO-52930

Green for Growth Fund, Southeast

Quick Facts

Financial Institutions	Netherlands Development Finance Company (FMO)
Status	Approved
Bank Risk Rating	B
Voting Date	2018-11-15
Borrower	Green for Growth Fund
Sectors	Climate and Environment, Finance
Ring Fence	Climate
Investment Type(s)	Loan
Investment Amount (USD)	\$ 11.33 million
Project Cost (USD)	\$ 22.65 million

Project Description

According to FMO's website, this project provides financing to the Green for Growth Fund for funding activities to achieve a 20% reduction in energy or resource consumption and / or a 20% reduction in CO2 emissions.

Investment Description

- Netherlands Development Finance Company (FMO)

Private Actor Relationship

There is often limited information publicly available about what development banks are funding through financial intermediaries. In 2021, the Early Warning System partnered with Oxfam International to incorporate information on high-risk projects being funded by financial intermediaries receiving funding from the International Finance Corporation (IFC) and the Dutch Development Bank (FMO).

The information listed below describes the relationship between the different private actors linked to high-risk sectors and subprojects of IFC and FMO's financial intermediary investments and/or the financial intermediary's parent companies made from 2017 through 2020, including any associated ring fences.

The database, however, does not explicitly or implicitly imply that IFC or FMO have material exposure to or are contractually or legally accountable to the sub-projects financed by their financial intermediaries or the financial intermediary's parent companies. It only shows a seemingly financial relationship among the different private actors, the financial intermediaries, and IFC or FMO.

Private Actors Description

"Green for Growth Fund ("GGF") is a structured debt fund with EUR 578 million committed capital, managed by Finance in Motion ("FiM"). It is the first specialized fund to advance energy efficiency (EE), renewable energy (RE) and resource efficiency (REff) in Southeast Europe (incl. Turkey), the European Neighborhood Region-East, and the Middle East and North Africa (MENA). GGF is an innovative public-private partnership established to reduce energy consumption and CO2 emissions. GGF provides refinancing to financial institutions to enhance their participation in the EE and RE sectors and also makes direct investments in non-financial institutions with projects in these areas. The activities of GGF are supported by a technical assistance facility."

ACCESS TO INFORMATION

As part of FMO's ex-ante disclosure (disclosure of transactions before contracting), you can send requests or questions for additional information to: disclosure@fmo.nl

ACCOUNTABILITY MECHANISM OF FMO

Communities who believe they will be negatively affected by a project funded by the Dutch Development Bank (FMO) may be able to file a complaint with the Independent Complaints Mechanism, which is the joint independent accountability mechanism of the Dutch Development Bank (FMO) and the German Investment Corporation (KfW). A complaint can be filed in writing, by email, post, or online. The complaint can be filed in English or any other language of the complainant. The Independent Complaints Mechanism is comprised of a three-member Independent Expert Panel and it can provide either problem-solving, compliance review or both, in either order. Additional information about this accountability mechanism, including a guide and template for filing a complaint, can be found at: <https://www.fmo.nl/independent-complaints-mechanism>
