<b>Investment Amount (USD)</b>	\$ 10.00 million
<b>Loan Amount (USD)</b>	\$ 10.00 million
<b>Project Cost (USD)</b>	\$ 10.00 million

---

### Project Description

FMO arranged a syndicated loan agreement for Aklease, bringing a strong group of investors to Aklease. It will enable Aklease to continue its growth in renewable energy projects and helps support job creation in the country through SME's.

---

## Investment Description

- Netherlands Development Finance Company (FMO)

The proceeds of the syndicated loan will be used to support renewable energy & energy efficiency projects, Small and Medium-Sized companies (SME's) and international trade finance projects.

## Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.

- [Akbank T.A.S.](#) (Financial Intermediary) **is owned by Akbank** (Parent Company)

---

## Private Actor Relationship

There is often limited information publicly available about what development banks are funding through financial intermediaries. In 2021, the Early Warning System partnered with Oxfam International to incorporate information on high-risk projects being funded by financial intermediaries receiving funding from the International Finance Corporation (IFC) and the Dutch Development Bank (FMO).

The information listed below describes the relationship between the different private actors linked to high-risk sectors and subprojects of IFC and FMO's financial intermediary investments and/or the financial intermediary's parent companies made from 2017 through 2020, including any associated ring fences.

The database, however, does not explicitly or implicitly imply that IFC or FMO have material exposure to or are contractually or legally accountable to the sub-projects financed by their financial intermediaries or the financial intermediary's parent companies. It only shows a seemingly financial relationship among the different private actors, the financial intermediaries, and IFC or FMO.

## Private Actors Description

Ak Finansal Kiralama A.S. (“Aklease”), the leasing subsidiary of Akbank T.A.S., one of the largest private banks in Turkey. Aklease provides financial support to investors varying from corporate segment to SMEs. Along with financing machinery and equipment as the main investment item in Turkey, Aklease is able to offer leasing opportunity to its customers in renewable energy and sizable infrastructure investments.

## ACCOUNTABILITY MECHANISM OF FMO

Communities who believe they will be negatively affected by a project funded by the Dutch Development Bank (FMO) may be able to file a complaint with the Independent Complaints Mechanism, which is the joint independent accountability mechanism of the Dutch Development Bank (FMO) and the German Investment Corporation (KfW) . A complaint can be filed in writing, by email, post, or online. The complaint can be filed in English or any other language of the complainant. The Independent Complaints Mechanism is comprised of a three-member Independent Expert Panel and it can provide either problem-solving, compliance review or both, in either order. Additional information about this accountability mechanism, including a guide and template for filing a complaint, can be found at: <https://www.fmo.nl/independent-complaints-mechanism>
