Project Description

The Paraguay Banking Sector. Since 2012, FMO has been working with its client banks, non-FMO clients and other stakeholders on a Sector Initiative to collaboratively introduce higher environmental and social standards for the banking sector. FMO has focused primarily on managing the risks associated with natural habitat loss aspects of banks' lending in agricultural and cattle sectors due to legal and illegal deforestation.

FUNDING OBJECTIVE

For learning and accountability purposes, FMO is planning to outsource an evaluation on the Sector Initiative in Paraguay. The evaluation has two primary purposes: (i) to provide evidence of results to meet accountability requirements, and (ii) to promote operational improvement, learning and knowledge sharing through results and lessons learned. These lessons learned are deemed important for the continuation of this Initiative as well as any future Sector Initiatives to be supported by FMO.

WHY WE FUND THIS PROJECT

As a DFI, FMO has a role to play to support the banking sectors in the countries in which it operates, to improve environmental and social standards. This is timely in Paraguay where FMO has performed a sector initiative since 2012. It is crucial to assess the effectiveness of this sector initiative before its continuation.
