## Project Description

The syndicated facility of USD 90m In 2.5-year working capital loan will allow ETG to have sufficient liquidity to continue its operations, maintain employment and continue its support to farmers across Africa. A considerable share of ACF's sourcing is from Least-Developed Countries. ETG plays a key role in various agricultural value chains (cashew nuts, sesame seeds, pulses etc.). In Africa, it uses its own supply chain infrastructure to source over 80% of its agricultural commodities at farm-gate and operates processing plants that create value for the local economies. ETG is also one of the largest importers and distributors of fertilizer in Africa, playing an important role in enhancing incomes of African farmers.
