## Project Description

According to the Bank's website, FMO's financing will enable Terrasos, considered a credible target for Fund IV, to deliver on its three short term priorities to improve the resilience of their business model and replicate their impact. 1) To develop new revenue streams from existing Habitat Banks alongside the biodiversity credits, such as non-timber forest products or eco-tourism. 2) To further develop their approach and structures to generate and market biodiversity credits for the voluntary market. 3) To expand their consulting operation, allowing them to replicate their impact by working with other biodiversity net-gain initiatives across LAC. By financing Terrasos ahead of the first close of Fund IV, FMO also facilitates the fund manager warehousing of the deal.
