Project Description

As stated on the project disclosure page, FMO will invest up to USD 50 mln into the Fund's debt layer, of which up to USD 30 mln will be committed to the Fund's first close. First-close fund size will be around USD 100 mln and final target fund size is USD 250 mln. FMO's funding will be invested into different projects and companies in the renewable energy sector, including smaller Independent Power Producers, mini-grids, isolated grids and energy access companies. REPP2's investment objectives are (i) to invest and support the small to medium scale distributed renewable energy sector in Sub-Saharan Africa (as defined by the UN) with a particular focus on LDCs, thereby achieving a sustainable return on investments for investors, and (ii) to mitigate GHG emissions and build the climate resilience of the energy system.

Debt financing for small to medium scale energy companies and projects in Africa is considered scarce, particularly in LDCs. The Fund is highly aligned with FMO's strategy to reduce inequalities between countries and to support initiatives related to energy access. FMO's Green and Reducing Inequalities labels are expected to apply 100% given the investment focus of REPP2 on renewable energy projects in LDCs.

Early Warning System Project Analysis

The FMO categorized the project risk as B+. This concerns an Environmental and Social (E&S) risk category B+ investment. While most of the investments in the currently presented pipeline are assessed as low to medium risk and the Fund is excluding category A investments, some investments will be made in Fragile States with higher contextual risks.

ACCOUNTABILITY MECHANISM OF FMO

Communities who believe they will be negatively affected by a project funded by the Dutch Development Bank (FMO) may be able to file a complaint with the Independent Complaints Mechanism, which is the joint independent accountability mechanism of the Dutch Development Bank (FMO) and the German Investment Corporation (KfW). A complaint can be filed in writing, by email, post, or online. The complaint can be filed in English or any other language of the complainant. The Independent Complaints Mechanism is comprised of a three-member Independent Expert Panel and it can provide either problem-solving, compliance review or both, in either order. Additional information about this accountability mechanism, including a guide and template for filing a complaint, can be found at: <https://www.fmo.nl/independent-complaints-mechanism>
