Project Description

This Enhance Direct Access (EDA) Pilot is built on the strong institutional foundation of the Namibian Community-based Natural Resource Management (CBNRM) network, which consists of communal conservancies and community forests in the rural communal areas of Namibia. It comprises 8 Non-Government Organizations (NGOs) and the University of Namibia. These existing institutions are ideally placed to be the conduits for the implementation of local-level climate action.
It is expected that the project improve land management of an area of 7,200,000 hectares. The project will run over five years and consists of two complementary components that will empower rural communities to respond to climate change in terms of awareness, adaptive capacity and low-carbon rural development.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating problem solving or conducting a compliance process. You can learn more about the Independent Redress Mechanism and how to file a complaint at https://irm.greenclimate.fund/.

You can access a video about the IRM (English) at: https://youtu.be/1LanbriVhfs.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: https://irm.greenclimate.fund/.
