Climate-Resilient Water Sector in Grenada (G-CREWS)

Early Warning System

Climate-Resilient Water Sector in Grenada (G-CREWS)

GCF-FP059

Quick Facts

Countries	Grenada
Financial Institutions	Green Climate Fund (GCF)
Status	Proposed
Bank Risk Rating	B
Voting Date	2018-02-27
Borrower	Ministry of Finance, Energy, Economic Development, Planning & Trade
Sectors	Water and Sanitation
Investment Type(s)	Grant
Investment Amount (USD)	$ 40.82 million
Grant Amount (USD)	$ 40.82 million
Project Cost (USD)	$ 48.65 million

Project Description

According to the Green Climate Fund, this project will help the water sector in Grenada to undergo a comprehensive transformation on multiple levels. To obtain this objective, the project has __ components:

1. Climate-resilient water governance. Under this component, a water resource management unit will be established, a climate-responsive water tariff will implemented, and there will be a cross-sectoral mainstreaming of climate resilience into policies, plans, and regulations of water-related sectors.
2. Climate-resilient water users. This component aims to strengthen adaptive capacity and reduce risk exposure through creating a challenge fund to promote the adoption of water-efficient solutions in the agriculture and tourism sectors. It will also raise awareness of the issues through awareness, education, and outreach.
3. Climate resilient water supply systems. This component involves investments in infrastructure to assure water availability, increasing existing potable water storage capacity in medical centers, nd reduce disruptions in Grenada's water supply systems.
4. Additional contributions of the water sector to Grenada's Nationally Determined Contribution (NDC) under the Paris Climate Agreement. In this component, strategies for reducing water loss will be implemented.
5. Regional learning and replication. This component allows fo the creation of best practice sharing mechanisms and learnings in the region.

People Affected By This Project

The project proposal states that the whole population of Grenada (approx. 106,000 people, of whom about 50 % are of female female) will be beneficiaries of this project.

Investment Description

- Green Climate Fund (GCF)

Government of Grenada co-financing: EUR 4.267 million (approximately US$4.95 million)

Germany’s Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) Grant: EUR 2.50 million (approximately US$2.9 million)

ACCESS TO INFORMATION

Requests for project information may be submitted using the IDP Request for Information by email to: disclosure@gcfund.org.

You can also submit an information request using this online form: https://www.greenclimate.fund/about/disclosure/form. Additionally, if information requested is denied, an appeal can be filed to the Information Appeals Panel: iap@gcfund.org. You can learn more about the Information Appeals Panel at: https://www.greenclimate.fund/about/disclosure/appeals.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating problem solving or conducting a compliance process. You can learn more about the Independent Redress Mechanism and how to file a complaint at https://irm.greenclimate.fund/.

You can access a video about the IRM (English) at: https://youtu.be/1LanbriVhfs.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: https://irm.greenclimate.fund/.
