Project Description

According to the GCF document, the project aims to reduce climate change vulnerability and greenhouse gas (GHG) emissions of four agricultural value chains in Cambodia, enhance resilience and productivity of target crops, and increase agricultural competitiveness and household incomes in the project areas. The project will operate in four vulnerable provinces, which have a history of agricultural losses due to extreme climate events and where main transport corridors are already available to link production to markets, namely Kampong Cham and Tbong Khmum provincesalong the Greater Mekong Subregion (GMS) southern corrid or, and Kampot and Takeo provinces along the south- coastal corridor

The project aims to enhance infrastructure resilience to climate change and “last mile” connectivity, enabling transformation of transport corridors into economic corridors. The project is expected to start on 1 July 2018 and end 30 June 2024.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating problem solving or conducting a compliance process. You can learn more about the Independent Redress Mechanism and how to file a complaint at https://irm.greenclimate.fund/.

You can access a video about the IRM (English) at: https://youtu.be/1LanbriVhfs.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: https://irm.greenclimate.fund/.
