### **Project Description**

According to the bank document, the project objective is to "enhance the climate resilience of ecosystems and vulnerable communities in the Churia region through integrated sustainable rural development and natural resource management approaches." The project has three components Component 1:Scaling up climate-resilient Sustainable Natural Resource Management (SNRM). Component 2:Strengthening institutions and planning for climate-resilient SNRM. Component3:Improving knowledge, awareness and local capacity for climate-resilient SNRM.

The project document states that the components will focus on:

- Establishing and strengthening an enabling institutional environment for climate-resili-ent SNRM;
- Strengthening the capacities of at least 750 local community-based organizations/ user groups5on recognizing climate threats, climate-resilient land use planning and sustain-able natural resource management, and supporting them to implement climate-resilient land use interventions;
- Large-scale adoption and promotion of climate-resilient land and forestry management practices on at least 512,499 ha, which specifically respond to climate-related threats, including landscape-scale restoration of critical ecosystems in vulnerable river systems;
- Reducing the incidence of sedimentary and flash flooding by improving soil and water conservation, and constructing small-scale infrastructure (stone walls, contour bunds, check dams, among others);
- Reducing deforestation and forest degradation through the implementation of sustain-able natural resource management (SNRM) practices and other measures that address the direct and underlying drivers of deforestation and forest degradation;
- Improving water recharge systems by reducing surface run-off water through the adoption of water conservation and water management practices/ technologies;
- Improving information consolidation, dissemination and monitoring to raise awareness on climate change and climate resilient land use practices, and strengthen the utilization of climate information in decision making and planning processes.

#### **ACCESS TO INFORMATION**

Requests for project information may be submitted using the IDP Request for Information by email to: disclosure@gcfund.org.

You can also submit an information request using this online form: https://www.greenclimate.fund/about/disclosure/form.

Additionally, if information requested is denied, an appeal can be filed to the Information Appeals Panel: iap@gcfund.org. You can learn more about the Information Appeals Panel at: https://www.greenclimate.fund/about/disclosure/appeals.

#### **ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND**

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating problem solving or conducting a compliance process. You can learn more about the Independent Redress Mechanism and how to file a complaint at https://irm.greenclimate.fund/.

You can access a video about the IRM (English) at: https://youtu.be/1LanbriVhfs.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: https://irm.greenclimate.fund/.
