Blue Action Fund (BAF): GCF Ecosystem Based Adaptation Programme
in the Western Indian Ocean

Quick Facts

| | |
|-------------------------|--|
| Countries | Madagascar, Mozambique, South Africa, Tanzania |
| Financial Institutions | Green Climate Fund (GCF) |
| Status | Approved |
| Bank Risk Rating | B |
| Voting Date | 2019-11-29 |
| Borrower | Blue Action Fund |
| Sectors | Climate and Environment |
| Investment Type(s) | Grant |
| Investment Amount (USD) | \$ 33.33 million |
| Grant Amount (USD) | \$ 33.33 million |
| Project Cost (USD) | \$ 61.11 million |

Project Description

The project has three components:

1. **Funding window for protection and sustainable management of coastal resources relevant for EbA (mangroves, coral reefs seagrass).** BAF will on-grant funds for the implementation of this component on the basis of the agreed project implementation plans and budgets of the approved sub-projects (see above).
2. **Funding window for rehabilitation of degraded coastal ecosystems relevant for EbA.** As for Component 1, BAF will on-grant funds for the implementation of this component on the basis of the agreed project implementation plans and budgets of the approved sub-projects, while actual implementation will be carried out by the eligible NGOs. Eligible measures comprise restoration of ecosystems, complementing measures under Component 1, such as:
 - (I) Mangrove reforestation,
 - (II) Seagrass rehabilitation,
 - (III) Rehabilitation of beach vegetation, and
 - (IV) Coral reef restoration where applicable, e. g. with more temperature-resilient species.
3. **Support for knowledge exchange and capacity building regarding appropriate and feasible EbA approaches.** All projects supported by the Blue Action fund are expected to also contribute to and support the knowledge exchange and capacity building regarding appropriate and feasible EbA approaches. In fact, knowledge exchange related to changes in habitats and ecosystems, as well as best practices and lessons learned, are key for enhancing EbA.
