Project Description

The Programme will provide effective climate change mitigation outcome through investing in sustainable plantation forestry projects in emerging forestry markets of Latin America and Sub Saharan Africa, while also bringing adaptation co-benefits. This investment approach provides developing countries and their rural communities with a solution to increase carbon sinks by producing wood in a sustainable manner and conserving natural forests, whilst contributing to reduction of illegal logging.

Besides direct mitigation achieved in forest plantations, the Programme operations will lead to additional green house gas emission reduction benefits: the protection of natural forests in project areas, as well as the provision of alternative wood resources, will support efforts to combat deforestation and degradation of natural forests in project regions, and part of the carbon contained in harvested trees will be stored in wood products.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating problem solving or conducting a compliance process. You can learn more about the Independent Redress Mechanism and how to file a complaint at https://irm.greenclimate.fund/.

You can access a video about the IRM (English) at: https://youtu.be/1LanbriVhfs.

A brochure about the IRM can be accessed in English, French, Spanish, Portuguese, Arabic, Mandarin, Mongolian, Vietnamese, Russian, Ukrainian, Korean, German, and Kiswahili at: https://irm.greenclimate.fund/.
