Ecosystem-based Adaptation to increase climate resilience in the Central American Dry Corridor and the Arid Zones of the Dominican Republic

Ecosystem-based Adaptation to increase climate resilience in the Central American Dry Corridor and the Arid Zones of the Dominican Republic

Quick Facts

Countries	Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, Panama
Financial Institutions	Green Climate Fund (GCF)
Status	Approved
Bank Risk Rating	B
Voting Date	2021-10-07
Borrower	Central American Bank for Economic Integration (CABEI)
Sectors	Agriculture and Forestry, Climate and Environment
Investment Type(s)	Grant, Guarantee, Loan
Investment Amount (USD)	$ 174.30 million
Loan Amount (USD)	$ 60.00 million
Grant Amount (USD)	$ 84.30 million
Project Cost (USD)	$ 268.40 million

Project Description

The objective of this project is to contribute to transforming the Dry Corridor region, one of the most affected by climate change in the world, facilitating access to micro-financing for adaptation to vulnerable communities. The focus of the sub-projects will be the recovery of ecosystem services that cushion the impacts of climate change and the creation of market opportunities so that small-scale financial entities can play a multiplying role in climate action.
There will be indigenous peoples involved only in Guatemala.
The Environmental and Social Management Framework of the Project says that during the execution of the project, the information, analysis and safeguards mechanisms must be complemented in a much more profound way and that a specific Stakeholder Involvement Plan must be carried out for each one of the project's basins.

Investment Description

- Green Climate Fund (GCF)
