Project Description

As stated by the GCF, targeting the Trois-Rivières (TR) region, this project will enhance the resilience of communities by initiating a shift towards an integrated, climate-smart approach to land and water resources management. It will promote ecosystem-based flood management solutions, sustainable agricultural practices, and strengthened water governance frameworks. Through these interventions, the project is expected to reduce the number of households affected by extreme flood events by over 50 per cent. Furthermore, this initiative aims to scale up a transformative change in the interaction with, and respect for, natural resources by decision makers and communities in the TR watershed.

ACCOUNTABILITY MECHANISM OF GREEN CLIMATE FUND

The Independent Redress Mechanism (IRM) addresses complaints by people who believe they are negatively affected or may be affected by projects or programmes funded by the Green Climate Fund (GCF). The complainant can raise issues related to any of GCF's policies and procedures, including those relating to social and environmental issues, indigenous peoples, gender, and information disclosure, among others. If you submit a complaint to the IRM, it may seek to address the issues raised by facilitating problem solving or conducting a compliance process. You can learn more about the Independent Redress Mechanism and how to file a complaint at https://irm.greenclimate.fund/.
